PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER

March - June 2025

NEORIS (EPAM Systems)

- Contributed to Agile development processes through daily Scrum meetings.
- Built responsive user interfaces using Angular, TypeScript, and Bootstrap; followed best coding practices and documented development workflows.
- Developed a personal developer portfolio and deployed it via GitHub Pages; practiced Git version control for collaborative development.
- Collaborated on a full-stack web application with role-based access control, integrated APIs, and conducted component testing with team members.

ESL TUTOR & LANGUAGE ASSISTANT

June 2017 - Present

QQ English, Philippines & Schools in Spain

- Developed strong communication and collaboration skills through multilingual instruction and cross-cultural environments.
- Applied analytical thinking and planning to create and adapt lesson plans — skills transferable to structured software development.
- Gained experience in assessment, documentation, and organization — essential for debugging, testing, and project documentation.
- Demonstrated adaptability and problem-solving by supporting diverse learners and navigating changing classroom environments.
